

"Now offering in-office Balloon Sinuplasty."

Sinusitis affects 37 million Americans each year, making it one of the most common health problems.

- Balloons Sinuplasty is a breakthrough procedure that relieves the pain and pressure associated with sinusitis.
- We are now offering this procedure in our office under local anesthesia.
- Quick recovery time, return to work and normal activities the same day in most cases.
- Eliminates need for general anesthesia
- Clinically proven
- Safe and effective
- Covered by most insurances
